Education

Master's in Fundamentals and Engineering of Information and Image
Université of Ferhat Abbas, Sétif   09/2023 - Present

Bachelor's in Computer Systems
Université of Ferhat Abbas, Sétif   10/2020 - 07/2023

Projects

E-Commerce Mobile Application
Flutter   07/2024

Created a fully functional e-commerce platform with Firebase integration, product management, authentication, real-time database synchronization, and secure payment options. Implemented dynamic user interfaces and seamless shopping experience.

Library Management Desktop Application
C#   06/2024

Developed a desktop application to streamline client management and automate the calculation of school supplies prices, improving operational efficiency and customer service. Features include inventory pricing calculations, and client database management.

Blood Donation Mobile Application
Flutter   05/2023

A mobile application to connect blood donors with recipients, featuring real-time donation requests, location-based matching, and user authentication.

Skills

C++ · Python · C# · Dart · SQLite · Flutter

Mobile developer · Desktop developer · AI and data science engineer · Machine learning engineer

Summary

Passionate about leveraging software engineering skills in mobile development, AI, machine learning, and data sciences to create impactful solutions. With a strong academic foundation in computer systems and ongoing advanced studies, eager to contribute innovative desktop and mobile applications that resonate with shared goals. Committed to harnessing technical expertise to drive forward-thinking projects and enhance user experiences.

Interests & Hobbies

Working in Groups: Strong team player, committed to contributing to group success through clear communication and shared problem-solving.

Continuous Learning: Dedicated to expanding my knowledge every day, seeking new opportunities for growth and skill development.

Problem Solving: Enjoy tackling complex challenges and finding creative solutions to improve efficiency and achieve goals.
